Gor Khachatryan.

Shopify Developer · Store Design & Development

I design and build **Shopify stores that look like real brands — not templates.**

From 2021 to 2025 I worked as a brand and motion designer, creating identities, ad visuals and motion content for businesses, mostly in the European market. I've also planned and run Meta Ads campaigns, so I know what happens before a customer lands on a store. Since late 2025 I build in Shopify — bringing brand-level design, the technical skills to build it, and an understanding of the marketing around it.

WHAT I BUILD

- Custom Shopify themes and sections (Liquid)
- Redesigns — clean, modern, mobile-first
- No-code theme settings for store owners
- Store setup: products, collections, mega menus
- Product pages, cart drawers, scroll animations
- Promo videos and ad creatives for launches

EXPERIENCE
